

Career Questions 24/7

Career Gear provides an online career question community where students can post questions whenever they want!

If you are like other career professionals, about 80 percent of the questions you handle are very similar. With students at the beginning of their career exploration and planning, they tend to be struggling with the same issues.

We found a way to use technology to answer similar questions while at the same time giving students access to a rich library of unique questions and responses.

We built into Career Gear, our online e-learning career platform, a powerful career question community that will enable students to view recent, most popular questions and search for relevant responses.

Students will also be able to:

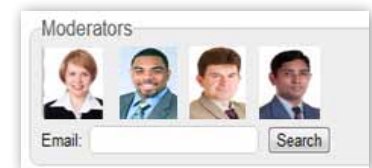

1. Vote on their favorite questions and responses.
2. Elect to be notified when new comments are shared.
3. Quickly jump from one career category to another.

With Career Gear, when your office is closed and your students have questions they need answered, they can get their answer, on their SmartPhone, SmartPad, or computer, using your innovative career question community.

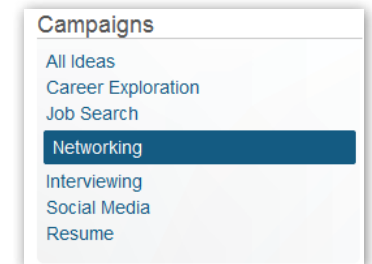

Take the next step to help your grads have a successful career!
